Attn: Keri Irvin
MSDS Clerk
Douglas Aircraft Company

Dear Ms. Irvin:

We have received your request for Material Safety Data Sheets (MSDS's) for the following Polyken Technologies products:

POLYKEN #'s: 231
510

Polyken Technologies has prepared no formal MSDS information for these products, as they are not considered hazardous substances under OSHA's Hazard Communication Standard (29 CFR 1910.1200, as amended in the August 24, 1987 Federal Register). To be considered a hazardous substance (requiring an MSDS), a product must have shown statistically significant evidence, based on at least one study conducted in accordance with established principles, that acute or chronic health effects may occur in exposed employees, and/or presents an otherwise significant health hazard.

Your concern for safety is nevertheless appreciated, and if you still have questions about safety aspects of these products, please let me know and I will place you in contact with the appropriate Polyken technical specialist.

Sincerely,

Gloria J. Miele
